

The Design Workplace

ASSESSMENT TASK 2

Mural Design and WHS Workbook

Due week: 8

Student name: Tek Huynh

Student number: S60001164

Email address: tekhuynh@gmail.com

COURSE TITLE

CUA30720 Certificate III in Design Fundamentals

SUBJECT TITLE

A10157 The Design Workplace

TRAINING UNITS

A: CUADES304 Source and apply design industry knowledge

B: CUAWHS312 Apply work health and safety practices

C: CUAPPR314 Participate in collaborative creative projects

ASSESSMENT TASK 2

MURAL DESIGN AND WHS WORKBOOK

Assessment Task 2 is a continuation of Assessment Task 1. In this Assessment Task students will develop and finalise their Mural Design and work through a series of questions and activities relating to workplace safety in the design workplace, specifically relating to the 'Team Up' case study. Students must use the Case Study provided, alongside their own experience and research to answer the questions.

ASSESSMENT SUBMISSION

Students must complete *all activities* in the workbook.

All sources of information must be referenced following standard referencing conventions.

Supporting documentation may be added as additional pages to the back of the workbook.

** Please ensure all additional pages are labelled accordingly **

Where to submit this task:

Go to the Submissions Area and select ASSESSMENT TASK 2. Submit your work clearly labelled using this naming convention: FirstLast_A10157_AT2_DDMMYY

CONTENTS

1. Mural Development
2. Mural Design

8. Appendix

1. Mural Development (INDEPENDENT ACTIVITY)

Begin developing design ideas for a mural using the theme and colour direction that was decided upon in your team.

You can use the following pages to insert images, mood boards, examples of other artists or designers work that you find inspiring, your own drawings and sketches, notes or photographs from a sketchbook.

You may insert as many pages as you need to show the development of your ideas.

- I did a lot of math with Phi to try and find a pattern which I could express in this artwork. That failed.
- I title my proposed artwork to "The stars align" and tried hard to find a repeating wave pattern that would look nice with more patters or waveforms. That also failed.
- I went soul searching for something that would be beneficial and would fit the theme of Bauhaus and visionary.
 - o Where I really went, was to our good devil, Mister ChatGPT
- I opened the chat that got me in trouble the first time
 - o I haven't opened it since
- I realised again, what an amazing story that so mysteriously and eerily encapsulated the work dynamics within our team
 - o Perhaps it will give me something to work with again
- This time, I wanted to look into myself and see what I really needed right now as I work furiously to submit this late assignment.
 - o To relax and calm down
- I realised what I already knew again. That expectation kills creativity. The expectation for me to finish was the exact thing preventing me from also finishing.
 - o I needed a space
- I looked at the artwork that was previously generated.
 - o I like the tree
- Perhaps I can work with a tree
 - o Perhaps he can work with a tree
- And now I echo my own voice as I type furiously to finish not only this assessment, but 2 more before the end of the day.
 - o Before I present actually after mid day
- Stop it
 - o No you stop it.
- Yea anyways, I liked the tree and I tried continuing on with what I had last time. But it wasn't working. It wasn't happening. So I asked Mister GPT if he could give me a tree
 - o Give me a tree
- And he said.
 - o Here is the image of an ordinary tree standing alone in a serene field
- I looked and was alright. Better than anything I've already seen. Lets refine this.

- OK
- I'll attach the conversation to the appendix, but It has pretty much been summarised here

The generated image.

I wanted to also add something for you miss kim. I thought about how you would comment, and felt as if you would say that it needed a bit more of a human touch rather than just being a nature space. So I added a few little characters where we can empathise with while we stare into the endless starry night, together.

My artwork- looks worse, but hey, I got it vectorized and I am so glad I did project base. All that logo tinkering got me acquainted with illustrator.

Finally, I would like to tagline my artwork:

My milkshake brinks all the kunst to the yard

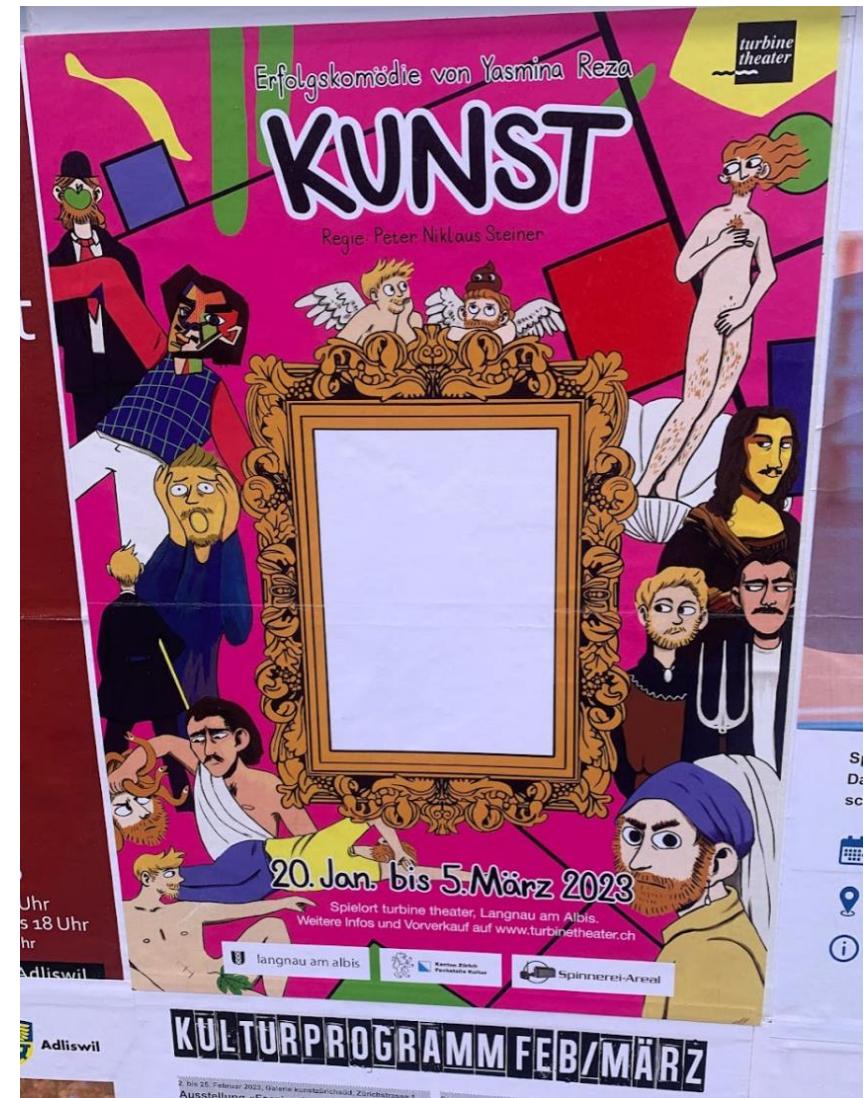

Kunst: German noun for art, skill, artistry

I know a bit of German, but this effective poster is how I came up with this multilingual masterpiece of a tagline. I was waiting for my friend at the station in Switzerland.

If I have time, id like to add a picture of John Farnham, holding a milkshake and posing as if for an album cover. I mean, it's a bit of Australian symbolism about the boy from around the block losing his way and finding himself again. The milkshake is because I already have the tagline and also, it's a song.

Oh maybe I can explode the milkshake bottle into the clouds.

If only I had time.

2. Mural Design

Present your Mural Design on a digital image that shows how it will look in place.

You can use the image provided in the subject resources or source your own image to show your Mural Design.

Your Mural Design must be two (2) metres tall by five (5) metres wide. You can work on your design at 25% or 50%.

3. Case Study

Workplace Health and Safety - Responsibilities

Refer to *WHS Acts, regulations, and Codes of Practice* to answer the following questions. Students should also refer to the case study and the Team Up handbook.

3.1. What are Frances's responsibilities as the Team Up Location Manager in ensuring the safety of her staff, clients, and others on the premises?

- Provide and ensure the completion of WHS induction
 - o Show clients/contractors and staff the locations of first aid kits
 - o Show clients/contractors and staff the location of emergency exits
 - o Show the clients the proper procedures for building evacuation
 - o Ensure the WHS checklist has been completed before being given access to the studio with the access fob.
- Verify all staff members and contractors have read and understood the
 - o Team Handbook
 - o Emergency Management Procedure
- Ensure compliance to WHS regulations during day-to-day operations

3.2. What are Simone's responsibilities as a client of Team Up in ensuring her own safety and the safety of others on the premises?

- Ensure she turns up and completes her WHS checklist before accessing the premises.
- She has read and understood the
 - o Team Handbook
 - o Emergency Management Procedures
- Ensures she understands all the emergency and safety procedures in the team handbook and explained by Frances during the induction
- Treat the facility with respect
- Ensure that any hazards while working are minimized

3.3. What are the responsibilities of other people conducting business on the premises in ensuring their own safety and the safety of others on the premises? Other people conducting business on the premises might be gallery visitors or couriers for example.

- Taking note of the location of fire extinguishers, first aid and emergency exits
- That they treat the facilities with respect
- Report any hazards that they may come across to the appropriate person
- They conduct themselves appropriately

3.4. At Team Up who would Simone speak with regarding any concerns she might have regarding safety on the premises?

- Simone should inform the location manager or trusted responsible staff.
- If she is not taken seriously about her concerns, she should contact Safe Work.

3.5. At Team Up who would Simone speak with regarding an accident, incident or near miss on the premises?

- Simone would be expected to speak to the location manager on duty at the time. If Frances was on duty, she should be spoken to because she is responsible for the incident report.
- If she is not taken seriously, she should contact another staff member or SafeWork

3.6. Look at the form titled *Induction Checklist*. Read the case study and complete the checklist with the induction items that Frances has completed with Simone. Attach the Induction Checklist in the appendix of this workbook.

3.7. Did Frances complete the Induction with Simone properly? Explain your answer using 2-3 short sentences.

No. Frances did not satisfactorily complete the induction with Simone. She handed the building access fob when she needed to leave the induction for the meeting. It is Frances' responsibility as site manager to ensure the safety of all people on the premises. By referring to the induction list in the previous question, we see that it is incomplete and thus Frances has essentially let loose a walking and talking hazard on to the premises.

3.8. What could Frances have done differently to improve this induction process? List at least one (1) thing.

What Frances should have done is gone through and completed the induction process. This process is standard operating procedure across all work premises across Australia and is designed to prevent the unnecessary injuries and deaths in the workplace.

- She could have rescheduled the induction process to be completed another time instead of giving access to the building.
- An in person multiple choice exam or online induction could replace verbal explanation and questioning for several items on the checklist to optimise the induction process.
- Keep an updated list on the people trained to lead and respond in emergency situations on a pin board or notice board in a common area so that it is easy to point to instead of having to collate the list every time, which may become out of date if there is high churn in the workplace.

Actually, if these suggestions were implemented, the first 3 points on the checklist would have been the final items to address before handing over the access fob and we wouldn't have this problem

For a time, I was working at Mickey Ds and most of the safe operating procedures were done online because it wasn't specific to the site. The onsite checks were done in conjunction with the workplace tour where the manager identified the location of where things were stored, and how to jump on rubbish....

4. Case Study

Workplace Health and Safety: Hazards and Risks

4.1 What is a hazard?

A Hazard is a risk that can cause injury or death. It can generally be seen, felt, smelt or sensed in some tangible way. A hazard is a subset of risk. Examples are:

- Slips
- Heavy lifting
- Respiratory and Fumes
- Ergonomics
- Psychological
- Fungi and Molds
- Animal bites
- Repetitive Motion Injuries
- Radiation
- Frances – for being complacent with her duties
- Simone – the walking hazard Frances let loose

A hazard is generally the subject of a scenario.

4.2 What is a risk?

A risk is potential. It concerns more with the probability and impact of the event or state of environment, rather than the event or environmental state itself. When talking about risk, we think through the scenario and project the future possibilities and the likelihood that they will occur.

A risk is generally the impact of scenario.

4.3 What is a risk assessment?

A risk assessment is when you use look for what might be dangerous, think about how you might get hurt.

More generally, its identifying and estimating the probability of undesirable outcomes.

I believe the part where we figure out ways to reduce the risks would be called risk mitigation strategies.

4.4 Think about the case study and Team Up as a place of work.

What sorts of hazards might be present in this sort of workplace? What sort of harm might they cause and how does this harm occur?

Carry out a risk assessment by completing the Risk Management Matrix listing at least five (5) hazards that might be present at Team Up and attach it in the appendix of this workbook.

In appendix

4.5 Incorrect office ergonomics are a hazard that create the risk of an injury that occurs over time, such as RSI (Repetitive Strain Injury), now more commonly referred to as OOS (Occupational Overuse Syndrome).

Describe the correct ergonomics for an office workstation that would limit the risk of OOS.

- Chair: Adjustable, with lumbar support, feet flat on the floor, arms at a 90-degree angle.
- Desk: Height allows forearms parallel to the floor.
- Monitor: Directly in front, top of the screen at eye level, about an arm's length away.
- Keyboard: Flat or with a slight negative tilt, close to the edge of the desk.
- Mouse: Next to the keyboard, within easy reach.

4.6 List at least one (1) safety measure that can be taken to ensure mental well-being in the workplace.

- | | |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <ul style="list-style-type: none">- Taking a shower- Resting regularly- Going outside- Opening the blinds to see sunlight- Get pampered- Getting enough sleep- Take some time to ask yourself how you feel- Eat and drink- Do a power stance- Dress to impress (yourself mostly) | <ul style="list-style-type: none">- Paint the walls a nice colour that resonates positively with your working mind- Realise you have a micromanaging manager- Talk to Simone. Maybe. She might be nice. Who knows. |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

4.7 List at least one (1) risk if the above safety measure is not taken to ensure mental well-being in the workplace.

- Burn out
- Severe headache
- Dehydration
- Weight gain or loss
- High blood pressure
- Chronic fatigue
- Stress
- Digestion issues
- Cancer

4.8 PPE or Personal Protective Equipment is sometimes required to ensure we are working safely and minimizing the risk of an accident or injury. Simone is working with spray adhesive in her studio. What sort of PPE might she require to use this safely?

- Protective glasses
- Face mask to protect airways
- Protective gloves
- Closed shoes
- Coveralls

4.9 Find the appropriate safety sign that would be required to notify a worker of the PPE required in question 4.8 above. Insert it here.

https://getsigns.com.au/products/all-ppe-required-beyond-this-point-sign?variant=44179875135715¤cy=AUD&utm_medium=product_sync&utm_source=google&utm_content=sag_organic&utm_campaign=sag_organic&ad_source=1&gclid=CjoKCQjwpZWzBhCoARIsACvjWRNjhJh4yO9Wgb2ljlrl39mTGFyk81A1rMG3lvqmqiBefPiqVZOCaMboaAtByEALw_wcB

<https://www.indiamart.com/proddetail/aluminum-ppe-sign-board-22701818388.html>

NOTICE

**ALL PPE REQUIRED
BEYOND THIS POINT**

I crossed out the irrelevant ones, because I couldn't be bothered making a sign.

PPE's Sign Board

Here's a better one that's more relevant

4.10 Regulatory signs in the workplace are divided into seven categories. List three of these categories below.

1. Prohibition Sign
2. Mandatory signs
3. Limitation/Restriction Signs
4. Danger Signs
5. Warning Signs
6. Emergency Signs
7. Fire Safety Signs

4.11 Have a look at the hazard signs and safety symbols below. Select the correct meaning from the multiple-choice options.

	<p>What hazard is this sign warning?</p> <ul style="list-style-type: none">a) Trip hazard signb) Slippery surface hazard signc) Playground sign <h2>Trip Hazard</h2>
	<p>What is the purpose of this mandatory sign?</p> <ul style="list-style-type: none">a) Wear sunglasses mandatory signb) Sunny day warning signc) Wear eye protection mandatory sign <h2>Eye Protection</h2>
	<p>What category does this sign fall into?</p> <ul style="list-style-type: none">a) Fire safety signb) Mandatory equipment required signc) Hazard warning sign <h2>Fire Safety Sign</h2>

Is this sign: a) A warning sign? b) An emergency sign? c) A prohibition sign?
<h1>Emergency Sign</h1>

What does this sign mean? a) Exit this way b) Emergency Exit c) Emergency Assembly Point
<h1>Emergency Exit</h1>

Where would you find this sign? a) In the bathrooms b) Next to the elevators c) At the location of firefighting equipment
<h1>At location of the firefighting equipment</h1>

5. Case Study

Workplace Health and Safety. Responding to an Incident.

On Tuesday 18th February at 10.00am Simone comes into the studio using her fob. She enters the communal kitchen and as she does so, she trips on a loose tile and twists her ankle. She contacts the First Aid Officer who administers first aid. Simone sits with an ice pack on her ankle for twenty minutes. Her ankle is a bit sore, but she can move it about, and it is not overly swollen. She does not require hospitalisation, nor does she require any time off work.

5.1 Using bullet points, describe the procedure for recording this accident?

- Record Date and Time and location of accident
- Note all parties involved, including witnesses
- Note location manager
- Note the attending First Aid Officer administering aid to Simone
- Describe the incident
- Identify hazards and produce follow up actions if applicable (Prioritise the fixing of loose tile)
- Submit report to incident report register by location manager (Francis)

5.2 Complete the *Incident Report Form* and attach it in the appendix of this workbook.

5.3 Describe the workplace procedure for a staff member responding to an emergency evacuation at Team Up.

- Remain Calm and prepare to follow evacuation procedures.
- Listen to announcements and instructions from safety wardens and follow them
- move towards the closest emergency exit.
- Assist disabled persons if necessary to the stairwell. The stairwells are designed to keep fires in. Ensure that the door is safely closed and report to the emergency crew below.
- Follow the instructions for the designated fire warden in your department of office.
- Gather at the evacuation point and await instructions.

6. Case Study

Workplace Health and Safety. Maintaining WHS Knowledge

Use the Task Two Case Study. Follow the links to the codes of practice in your state or territory and answer the questions below.

6.1. What is the primary legislation that governs health and safety in the workplace?

<https://legislation.nsw.gov.au/view/html/inforce/current/act-2011-010>

Work Health and Safety Act 2011

Work Health and Safety Regulation 2017

The Work Health and Safety Act 2011 (NSW) (the Act) provides a framework to protect the health, safety and welfare of all workers and others in relation to NSW workplaces and work activities.

6.2. What is the purpose of Codes of Practice? Answer in 1-2 short sentences.

The codes can be found here <https://www.safework.nsw.gov.au/resource-library/list-of-all-codes-of-practice>

The purpose of the Codes of Practice provide guidelines for safe and compliant operation in various work environments and consistent standard procedures for when incidents happen and day to day operations. They outline the minimum standard of protection which can protect individuals and organisation from legal action. It also serves as educational material to inform and train workers on safe practices and compliance requirements. They are designed to assist in the systematic identification, assessment, and management of workplace risks.

6.3. Consider the Team Up business. Which codes of practice would apply to that place of work? List at least one (1) example.

- First aid in the workplace
- Hazardous Manual Tasks
- How to manage work health and safety risks
- Labelling of workplace hazardous chemicals
- Managing electrical risks in the workplace
- Managing psychosocial hazards at work

- Managing the work environment and facilities
- Managing the risk of falls at workplaces
- Preparation of safety data sheets for hazardous chemicals

6.4 Where would you go to ensure you maintained knowledge of the most current WHS legislation? List one (1) website.

<https://www.safework.nsw.gov.au/resource-library/list-of-all-codes-of-practice>

<https://www.safeworkaustralia.gov.au/law-and-regulation/codes-practice>

7. References

You must list *all* sources of information in the 'references' section of this workbook. Include books, websites, magazines, or any other sources of information you have gathered in order to complete your assessment task using the *Harvard Referencing Style* (www.citethisforme.com).

See additional resource for referencing requirements.

Fernandez, K n.d., 'Doing the painfully boring stuff together'.

8. Appendix

Insert additional pages in support of your assessment task here.

Additional pages you must include are:

- TEMPLATE_Incident-Report-Form
- TEMPLATE_Induction-Checklist
- TEMPLATE_Risk Management Matrix

WHS Induction Checklist

STAFF/MEMBER: Simone

INDUCTION DATE: 3/6/2024

TITLE / ROLE: Location Manager

INDUCTED BY.: Frances

INDUCTION CHECKLIST

INSTRUCTIONS FOR LOCATION MANAGERS:

Managers must complete this checklist with the new staff member/client. Use the checklist to ensure all parts of the induction are complete. The checklist must be signed by the location manager and the new staff member/client

ITEM	CHECK
Building evacuation plan	<input checked="" type="checkbox"/>
Location of first aid kits and fire extinguishers	<input checked="" type="checkbox"/>
Location of emergency exits	<input checked="" type="checkbox"/>
A list of employees that are first aid trained, safety officers and fire marshals	<input type="checkbox"/>
An emergency procedure plan	<input type="checkbox"/>
How to complete an incident report form	<input type="checkbox"/>
WHS responsibilities of the employee/employer	<input type="checkbox"/>
Safe operation of machinery (where applicable)	<input type="checkbox"/>
How to properly wear and use PPE (where applicable)	<input type="checkbox"/>

Incident Report Template

REPORTED BY: Frances

DATE OF REPORT: 3/6/2024

TITLE / ROLE: Location Manager

INCIDENT NO.: 01337999

INCIDENT INFORMATION

**Near Miss, Hazardous Storage,
Manual Handling, Slips Trips and**

INCIDENT TYPE: Falls, Property Damage

DATE OF INCIDENT: 3/6/2024

LOCATION: Team Up Central

CITY: Sydney

STATE: NSW

ZIP CODE: 2000

SPECIFIC AREA OF LOCATION (*if applicable*): Studio Workspace

INCIDENT DESCRIPTION

INCIDENT DATE: June 3rd, 2024; 3:01 pm

Simone was working on a heavy life-sized figure on herself.

She attempted to move this figure and it tipped over an unsecured shelf in the process.

The shelf was overstocked with a large number of premium paints.

Some paints were not securely capped or closed.

The shelf toppled over all of the paints.

A nearby blank canvas was present, and the paints splashed all over the floor and canvas, creating a masterpiece in the process.

NAME / ROLE / CONTACT OF PARTIES INVOLVED

1. Simone/Contractor/0403 020 100
2. _____
3. _____

NAME / ROLE / CONTACT OF WITNESSES

1. Tanya/Team Member/0404 044 040
2. Jill/Receptionist/0455 555 666
3. Frances/Location Manager/0405 060 708

POLICE REPORT FILED? No

PRECINCT: n/a

REPORTING OFFICER: Frances

PHONE: 0405 060 708

FOLLOW-UP ACTION

The incident was recorded in the IRR

There were no injuries so a incident report to SafeWork was not submitted
If there was harm done, the incident must be reported via phone and then in paper within 48 hours

Wet floor signs were present and used after the incident.

The shelves have been replaced and secured to the wall.

More shelves have been installed so that there is adequate space for items and so that the shelves are not overstocked
Staff have been informed of the proper lifting procedure and encouraged to ask for help for anything heavier than 7kg, even if they are buffed up.

The damage to others property was minimal in this case, but a dedicated workspace for higher value tools and consumable has been set up to reduce the risk for damage of high value items

Risk Matrix, Teks way. I think it makes sense at a glance and is much scarier and more effective in communicating risk, yet approachable and understandable when filling out. One of the reasons I do graphic design is to learn to communicate. The colours were offensively hideous, and I've included it at the end. Regardless, I think the composition (what I wanted to explore in assessment 1) is fundamental to communication, and communication is fundamental to function, and function is fundamental to design, and design is fundamental to balance, and balance is fundamental to beauty, and beauty is fundamental to motivation, and motivation is fundamental to meaning, and I believe meaning is fundamental to the current psychological pandemic which I believe to be the underlying cause for most of the physiological malfunctions killing the modern western world, including many of the ones people commonly die of at old age. My brain goes into rabbit holes sometimes (all the time actually and stopping it from doing so almost killed me).

<u>Before mitigation</u>	High Chance	Medium Chance	Low Chance
High Cost	<ul style="list-style-type: none"> - Inadequate induction and training - Chemical Exposure 	<ul style="list-style-type: none"> - Emergency Procedures Not Understood - Fumes and Vapours 	<ul style="list-style-type: none"> - Lightning Strike
Medium Cost	<ul style="list-style-type: none"> - Lifting Injury - Ergonomic Hazards - Trip and fall Hazards 	<ul style="list-style-type: none"> - Emergency Procedures Not Understood - Dust and Particulates - Psychosocial Hazards - Noise 	<ul style="list-style-type: none"> - Electrical Hazards
Low Cost	<ul style="list-style-type: none"> - Sharp Tools and Equipment 	<ul style="list-style-type: none"> - Lighting 	<ul style="list-style-type: none"> - Lost Child

<u>After mitigation</u>	High Chance	Medium Chance	Low Chance
High Cost	-	-	<ul style="list-style-type: none"> - Lightning Strike - Inadequate induction and training - Emergency Procedures Not Understood
Medium Cost		<ul style="list-style-type: none"> - Emergency Procedures Not Understood 	<ul style="list-style-type: none"> - Electrical Hazards - Chemical Exposure - Ergonomic Hazards - Dust and Particulates - Noise - Lifting Injury - Trip and fall Hazards - Psychosocial Hazards - Fumes and Vapours
Low Cost		<ul style="list-style-type: none"> - Sharp Tools and Equipment 	<ul style="list-style-type: none"> - Lost Child - Lighting

Hazards and Mitigation Strategies

- **Chemical Exposure:** Implement proper ventilation systems, provide and enforce the use of PPE, and ensure safe storage of chemicals.
- **Ergonomic Hazards:** Invest in ergonomic furniture, conduct regular training on proper lifting techniques, and encourage regular breaks.
- **Fire Hazards:** Properly store flammable materials, install and maintain fire extinguishers and smoke detectors, and conduct regular fire drills.
- **Noise:** Use noise barriers, provide hearing protection devices, and limit exposure time to loud noises.
- **Dust and Particulates:** Install dust extraction systems, provide masks, and ensure regular cleaning of workspaces.
- **Sharp Tools and Equipment:** Provide proper training on tool use, maintain tools regularly, and use cut-resistant gloves.
- **Electrical Hazards:** Conduct regular inspections of electrical equipment, use surge protectors, and follow electrical safety guidelines.
- **Trip and Fall Hazards:** Keep workspaces tidy, secure cables, and use slip-resistant mats.
- **Inhalation of Fumes and Vapours:** Ensure proper ventilation, provide respirators, and work in well-ventilated areas.
- **Lighting:** Install adequate lighting, use task lighting, and maintain lighting fixtures regularly.
- **Psychosocial Hazards:** Promote a supportive work environment, provide mental health resources, and encourage regular breaks and social interaction.

AND I just realised, there were 2 templates for the matrix. Doh!

I this was my previous colour choice mainly because MS Word but I don't think that excuse is legit. I used chatgpt to help me with the new colours. I kept this one here because I think logging is an invaluable tool for reflection

Before mitigation	High Chance	Medium Chance	Low Chance
High Cost	<ul style="list-style-type: none"> - Inadequate induction and training - Chemical Exposure 	<ul style="list-style-type: none"> - Emergency Procedures Not Understood - Fumes and Vapours 	<ul style="list-style-type: none"> - Lightning Strike

After mitigation	High Chance	Medium Chance	Low Chance
High Cost	-	-	<ul style="list-style-type: none"> - Lightning Strike - Inadequate induction and training - Emergency Procedures Not Understood -
Medium Cost		<ul style="list-style-type: none"> - Emergency Procedures Not Understood 	<ul style="list-style-type: none"> - Electrical Hazards - Chemical Exposure - Ergonomic Hazards - Dust and Particulates - Noise - Lifting Injury - Trip and fall Hazards - Psychosocial Hazards - Fumes and Vapours
Low Cost		<ul style="list-style-type: none"> - Sharp Tools and Equipment 	<ul style="list-style-type: none"> - Lost Child - Lighting

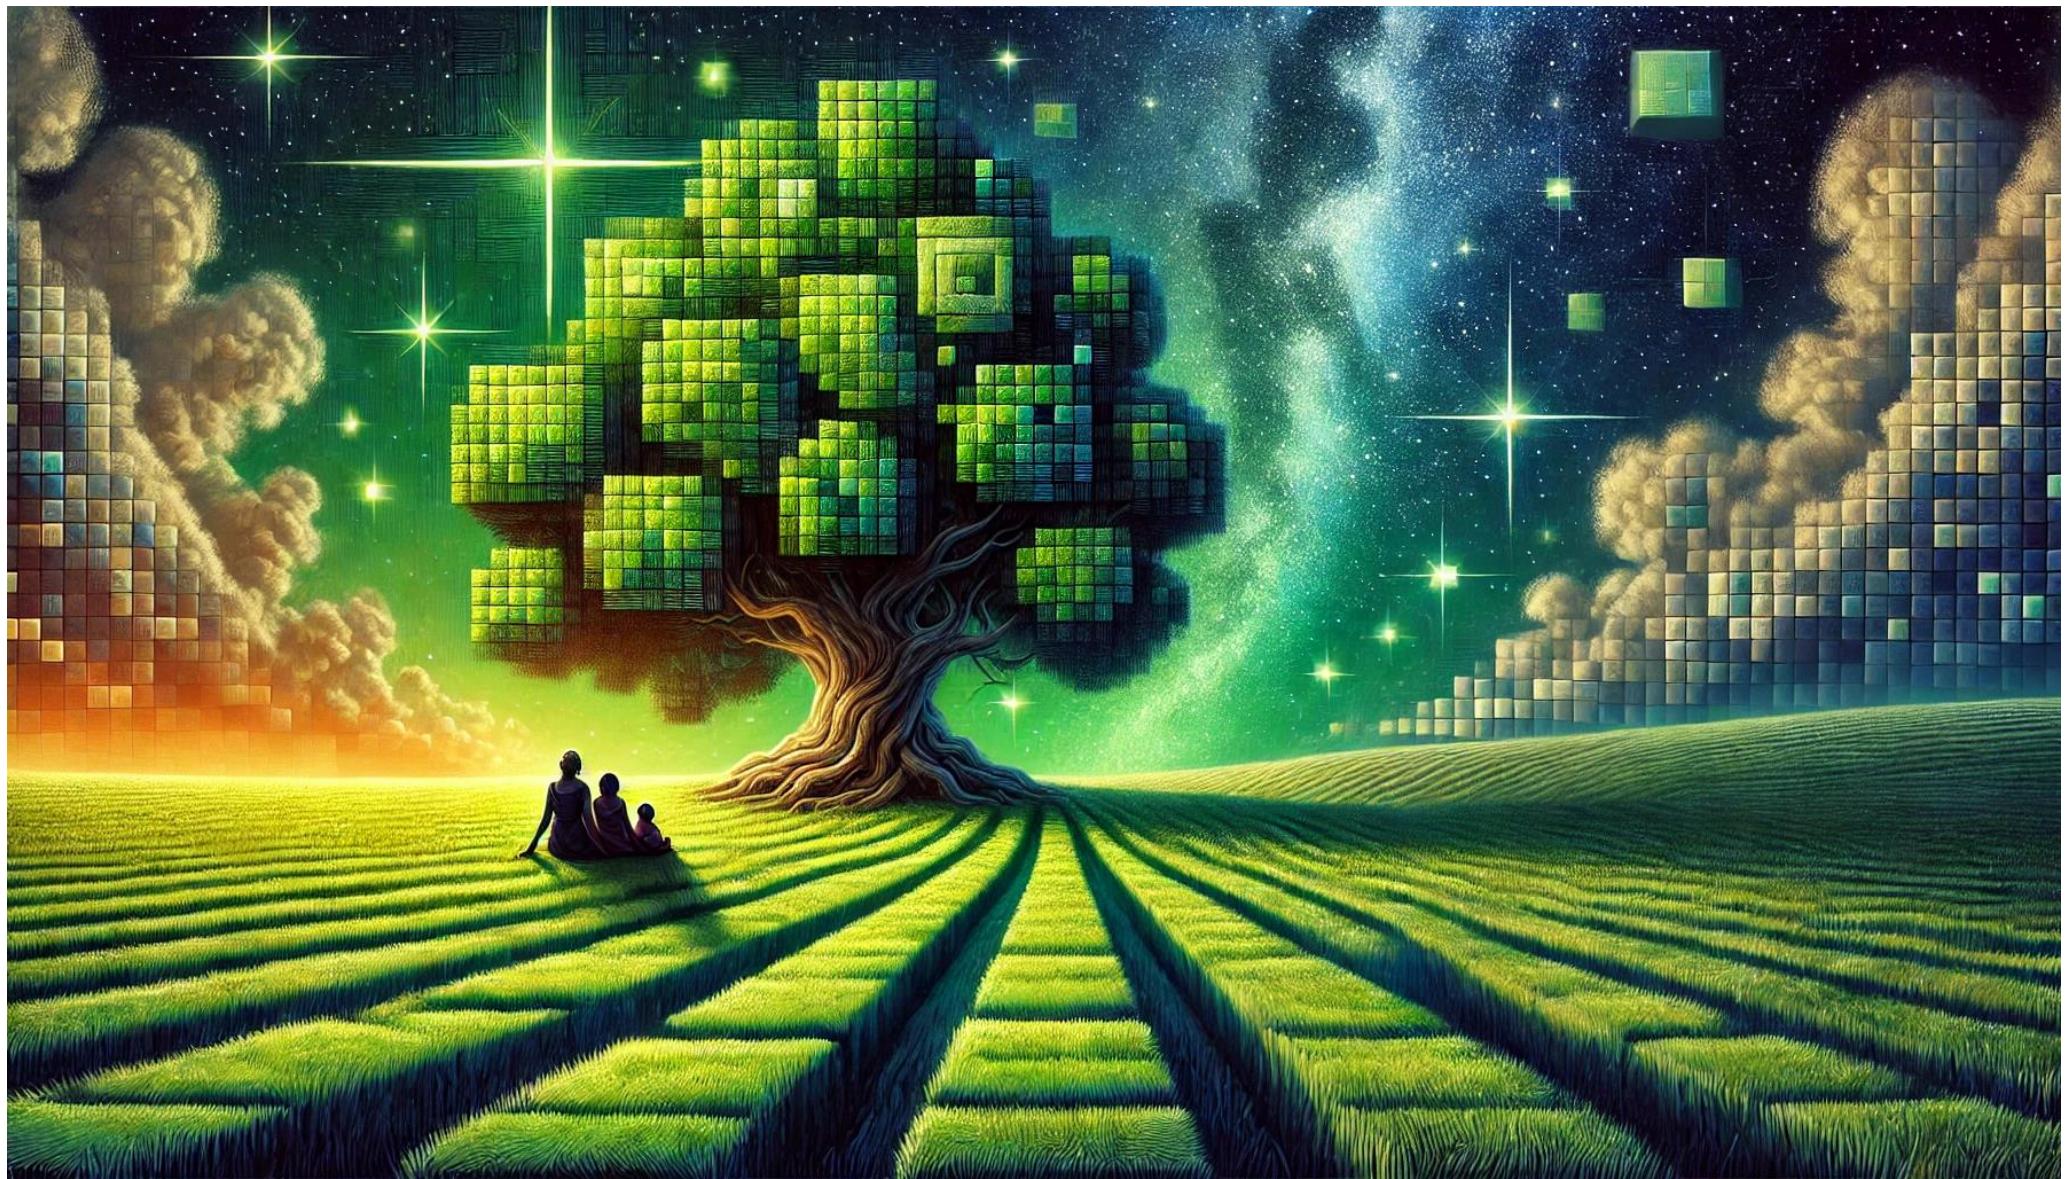

This Smartsheet thing destroyed my page layouts. I will make my own tables from now on. Plus, it wasn't exactly a matrix. It was a table with structured entries. Matrices are 2 dimensional and in this case, should group them by visually by likelihood in one dimension and severity on the other. Risk level is redundant.

can you generate a prompt for the final artwork again,

ChatGPT

Here is the detailed prompt for the final artwork:

A vibrant mural showcasing the harmonious fusion of science and art. At the center is a large, majestic tree with intricate roots intertwining with scientific symbols like DNA helixes, atoms, and mathematical formulas, depicted in precise, detailed lines of white and light blue. The roots symbolize the foundation of scientific knowledge. The trunk of the tree is robust and textured, with shades of deep brown and touches of green, symbolizing growth and strength.

The branches spread outwards, forming a canopy inspired by the shape of the human brain and the electricity inside it. The canopy is detailed with neural pathways and synaptic connections, depicted using electric-like lines and glowing nodes in vibrant neon colors such as blue, white, and purple. These connections represent the flow of knowledge and ideas. The brain-shaped canopy is further accentuated with hues of reds, yellows, and oranges, symbolizing active thought processes and creativity.

The background behind the canopy transitions from a gradient of deep purple at the top to black at the edges, providing depth and focus on the brain's shape. Abstract depictions of electrical pulses travel along the neural pathways, adding a dynamic and energetic feel. Surrounding the tree, the mural blends natural elements like leaves and flowers with abstract art forms in swirling patterns of green, teal, and gold. These elements represent the interconnectedness and harmony between nature and human innovation.

The overall composition is balanced, with the roots providing a solid, scientific base and the canopy showcasing free-flowing artistic expressions. This harmony between science and art is visually engaging and thought-provoking.

This prompt should provide a clear and detailed description for generating the final artwork.

4o

do you have any other ideas other than the tree, i want something more inspiring that wont lose its effect over time

ChatGPT

Sure, here is an alternative idea for the mural that maintains the fusion of science and art but in a different, enduring motif:

A captivating mural depicting the infinite loop of knowledge and creativity. At the center is a grand, intertwined double helix of DNA that spirals upwards, symbolizing the continuous journey of discovery and innovation. The strands of the DNA are interwoven with artistic patterns, merging scientific elements with flowing, abstract designs.

One strand of the DNA is composed of intricate scientific symbols like molecules, mathematical formulas, and technological components, rendered in detailed lines of white, silver, and light blue. These elements represent the precision and structure of scientific inquiry. The other strand is formed from vibrant, expressive colors and shapes, including splashes of reds, yellows, and blues, symbolizing the boundless creativity of artistic expression.

Around the DNA helix, a galaxy of interconnected stars and planets can be seen, representing the universe of possibilities that arise from the synergy of science and art. The background transitions from deep, cosmic purples and blues at the top to lighter, ethereal tones towards the bottom, creating a sense of depth and wonder.

Surrounding the helix are floating elements such as abstract gears, musical notes, and natural motifs like leaves and flowers, all intertwined in a dynamic dance. These elements are depicted in a harmonious blend of metallic and vibrant colors, symbolizing the balance between innovation and imagination.

The entire mural is framed by a border of interlocking geometric shapes, creating a cohesive and modern look. This design embodies the endless cycle of learning and creation, making it a timeless piece that inspires viewers to contemplate the beauty and interconnectedness of all knowledge.

This concept maintains the theme of merging science and art while introducing a more dynamic and eternal motif that encourages ongoing inspiration and reflection.

4o

another idea

ChatGPT

Here is another inspiring concept for the mural:

A mesmerizing mural representing the harmony between human ingenuity and the natural world. At the center is a colossal, stylized infinity symbol, representing endless possibilities and the continuous cycle of creation and discovery. One loop of the infinity symbol is filled with intricate technological and scientific elements, such as circuit boards, gears, DNA strands, and mathematical equations, depicted in sleek, metallic tones of silver, gold, and blue.

The other loop of the infinity symbol is adorned with vibrant, organic forms like blooming flowers, swirling water, lush greenery, and majestic animals, illustrated in rich, natural hues of green, blue, and earth tones. These elements symbolize the boundless creativity and beauty found in the natural world.

Where the loops of the infinity symbol intersect, there is a radiant burst of light, signifying the point of convergence between human innovation and natural inspiration. This central point glows with a spectrum of colors, creating a sense of energy and unity.

The background of the mural transitions from a serene sky blue at the top, filled with subtle, wispy clouds, to a grounding, deep earth brown at the bottom, symbolizing stability and growth. Around the infinity symbol, a dynamic array of abstract shapes and patterns swirl, representing the flow of ideas and the interconnectedness of all things.

Encircling the entire scene are representations of the four classical elements: Earth, Air, Fire, and Water. Each element is depicted with corresponding motifs—mountains and forests for Earth, clouds and birds for Air, flames and sunlight for Fire, and waves and marine life for Water. These elements frame the mural, emphasizing the balance and interplay between different forces of nature and human endeavor.

The mural is designed to be both visually striking and thought-provoking, encouraging viewers to reflect on the limitless potential when technology, science, and nature are in harmony.

This concept uses the infinity symbol to convey an enduring message of endless possibilities and the fusion of technology and nature, creating a timeless and inspiring piece.

Here is the mural featuring the Möbius strip, representing endless possibilities and the continuous cycle of creation and discovery. It includes the characters Dr. Nguyen, Ana Maria, and Carlos in the foreground, blending technological elements with vibrant organic forms to symbolize the harmony between human ingenuity and the natural world.

4o

could you make that in bahaus style

ChatGPT

A captivating mural in Bauhaus style representing the harmony between human ingenuity and the natural world. At the center is a grand, stylized Möbius strip, symbolizing endless possibilities and the continuous cycle of creation and discovery. One side of the Möbius strip is filled with geometric technological and scientific elements, such as circuit boards, gears, DNA strands, and mathematical equations, depicted in sleek, primary colors of red, blue, and yellow with black and white accents. The other side is adorned with geometric organic forms like abstract flowers, water waves, and leaves, illustrated in the same primary colors and clean lines. Where the sides of the Möbius strip intersect, there is a radiant burst of light, signifying the point of convergence between human innovation and natural inspiration. This central point glows with a spectrum of colors, creating a sense of energy and unity. The background of the mural is a minimalist gradient from serene sky blue at the top to grounding deep earth brown at the bottom, symbolizing stability and growth. Around the Möbius strip, dynamic geometric shapes and patterns swirl, representing the flow of ideas and the interconnectedness of all things. Encircling the entire scene are stylized representations of the four classical elements: Earth, Air, Fire, and Water, depicted in Bauhaus geometric motifs. In the foreground, three stylized Bauhaus characters are included: a meticulous scientist from Vietnam depicted in a simple lab coat, a passionate artist from Mexico with a palette and brushes, and an industrial designer from Brazil holding design blueprints. The mural is designed to be both visually striking and thought-provoking, encouraging viewers to reflect on the limitless potential when technology, science, and nature are in harmony.

Here is the Bauhaus-style mural featuring the Möbius strip, blending technological and organic elements with geometric forms and primary colors. It includes the characters Dr. Nguyen, Ana Maria, and Carlos in the foreground, symbolizing the harmony between human ingenuity and the natural world.

4o

could you add more nature elements and cut back on the science and technology

ChatGPT

A captivating mural in Bauhaus style representing the harmony between human ingenuity and the natural world. At the center is a grand, stylized Möbius strip, symbolizing endless possibilities and the continuous cycle of creation and discovery. One side of the Möbius strip is adorned with geometric organic forms like abstract flowers, water waves, leaves, and trees, illustrated in primary colors and clean lines. The other side has minimal geometric technological and scientific elements, such as simple gears and mathematical symbols, depicted in sleek, primary colors of red, blue, and yellow with black and white accents. Where the sides of the Möbius strip intersect, there is a radiant burst of light, signifying the point of convergence between human innovation and natural inspiration. This central point glows with a spectrum of colors, creating a sense of energy and unity. The background of the mural is a minimalist gradient from serene sky blue at the top to grounding deep earth brown at the bottom, symbolizing stability and growth. Around the Möbius strip, dynamic geometric shapes and patterns swirl, representing the flow of ideas and the interconnectedness of all things. Encircling the entire scene are stylized representations of the four classical elements: Earth, Air, Fire, and Water, depicted in Bauhaus geometric motifs. In the foreground, three stylized Bauhaus characters are included: a meticulous scientist from Vietnam depicted in a simple lab coat, a passionate artist from Mexico with a palette and brushes, and an industrial designer from Brazil holding

design blueprints. The mural is designed to be both visually striking and thought-provoking, encouraging viewers to reflect on the limitless potential when technology, science, and nature are in harmony.

Here is the updated mural featuring more nature elements and fewer technological aspects. It maintains the Bauhaus style, with a focus on geometric organic forms and minimal scientific elements, symbolizing the harmony between human ingenuity and the natural world.

4o

could you make that less abstract

ChatGPT

A captivating mural in Bauhaus style representing the harmony between human ingenuity and the natural world. At the center is a grand, stylized Möbius strip, symbolizing endless possibilities and the continuous cycle of creation and discovery. One side of the Möbius strip is adorned with realistic, geometric organic forms like blooming flowers, flowing water, lush trees, and vibrant leaves, illustrated in primary colors and clean lines. The other side has minimal, simplified geometric technological elements, such as small gears and mathematical symbols, depicted in sleek, primary colors of red, blue, and yellow with black and white accents. Where the sides of the Möbius strip intersect, there is a radiant burst of light, signifying the point of convergence between human innovation and natural inspiration. This central point glows with a spectrum of colors, creating a sense of energy and unity. The background of the mural transitions from a serene sky blue at the top to grounding deep earth brown at the bottom, symbolizing stability and growth. Around the Möbius strip, realistic geometric shapes and patterns swirl, representing the flow of ideas and the interconnectedness of all things. Encircling the entire scene are stylized, realistic representations of the four classical elements: Earth, Air, Fire, and Water, depicted in Bauhaus geometric motifs. In the foreground, three stylized Bauhaus characters are included: a meticulous scientist from Vietnam depicted in a simple lab coat, a passionate artist from Mexico with a palette and brushes, and an industrial designer from Brazil holding design blueprints. The mural is designed to be both visually striking and thought-provoking, encouraging viewers to reflect on the limitless potential when technology, science, and nature are in harmony.

Here is the updated mural featuring less abstract, more realistic geometric organic forms while maintaining the Bauhaus style. The mural represents the harmony between human ingenuity and the natural world with the Möbius strip at the center, surrounded by characters symbolizing different disciplines.

4o

could you make a mystical tree and use squares for leaves, triangles for flowers, circles for stars and bauhaus style lines for trunk and roots

ChatGPT

A captivating mural in Bauhaus style featuring a mystical tree at the center. The tree has a trunk and roots made of sleek, geometric Bauhaus-style lines in black and white. The branches are adorned with leaves shaped as squares in vibrant primary colors: red, blue, yellow, and green. Triangular flowers in similar bright colors add a dynamic touch to the branches. Circles representing stars are scattered around the tree, creating a sense of wonder and mysticism. The background transitions from a serene sky blue at the top to grounding deep earth brown at the bottom, symbolizing stability and growth. The overall design is clean and modern, with a harmonious balance of geometric shapes and Bauhaus style elements, creating a visually striking and thought-provoking piece.

Here is the mural featuring a mystical tree in Bauhaus style, with a trunk and roots made of sleek geometric lines, square leaves, triangular flowers, and circular stars. The vibrant primary colors and clean design elements create a visually striking and thought-provoking piece.

On the left side, a mother, father, and child are abstracted using only squares, circles, and triangles, sitting on the grass and looking up at the stars. The field is covered in soft, green grass depicted with geometric shapes that gently sway in the breeze. The sky above is darker, filled with rich, deep blue tones and scattered with twinkling stars made of circles and a few fluffy white clouds illuminated by a mystical light. The overall scene feels enchanting and otherworldly, combining the simplicity of nature with a sense of magic and wonder. The image is cell-shaded, giving it a stylized, cartoon-like appearance with bold lines and vibrant, flat colors. A touch of Bauhaus style is incorporated through the use of primary colors and clean, geometric forms throughout the scene. The aspect ratio is 16:9. Incorporate just a touch of warm colors from the provided palette.

Here is the updated image with a touch of the warm colors from the provided palette, maintaining the Bauhaus style, cell-shaded appearance, and the serene, magical atmosphere with the 16:9 aspect ratio. The geometric abstraction has been applied to create a visually engaging scene.

plt.show()

```

It seems there was an error in generating the updated table with improved colors. Let's proceed manually by providing a description of the improved color scheme for your table:

Improved Color Scheme:

- High Cost: Soft Red (#FF6F61)
- Medium Cost: Soft Orange (#FFB74D)
- Low Cost: Soft Yellow (#FFD54F)
- High Chance: Strong Red (#F44336)
- Medium Chance: Strong Orange (#FF9800)
- Low Chance: Strong Yellow (#FFEB3B)
- After mitigation: Soft Blue (#64B5F6)
- High Chance After: Soft Red (#EF5350)
- Medium Chance After: Soft Orange (#FF8A65)
- Low Chance After: Soft Yellow (#FFF176)

Using these colors, you can manually update the colors in your table to make them more aesthetically pleasing. If you prefer, you can provide me with the table data, and I can create a new table with the improved colors using an alternative method.

Using these colors, you can manually update the colors in your table to make them more aesthetically pleasing. If you prefer, you can provide me with the table data, and I can create a new table with the improved colors using an alternative method

what was the analysis error?

ChatGPT

The analysis error occurred during the generation of an image to represent the improved color scheme for your table. The process of applying the new color scheme to the table cells did not produce the expected result due to technical issues with the code execution environment.

To manually apply the improved colors to your table, you can use the following color scheme:

Improved Color Scheme:

High Cost: Soft Red (#FF6F61)

Medium Cost: Soft Orange (#FFB74D)

Low Cost: Soft Yellow (#FFD54F)

High Chance: Strong Red (#F44336)

Medium Chance: Strong Orange (#FF9800)

Low Chance: Strong Yellow (#FFEB3B)

After mitigation: Soft Blue (#64B5F6)

High Chance After: Soft Red (#EF5350)

Medium Chance After: Soft Orange (#FF8A65)

Low Chance After: Soft Yellow (#FFF176)

Steps to Manually Apply the Colors:

Identify the cells in your table that correspond to "High Cost," "Medium Cost," "Low Cost," "High Chance," "Medium Chance," and "Low Chance" before and after mitigation.

Apply the specified colors to the cells based on their category using the color codes provided.

For example:

Cells under "High Cost" before mitigation should be filled with Soft Red (#FF6F61).

Cells under "Medium Chance" after mitigation should be filled with Strong Orange (#FF9800).

By following these steps, you can update your table to have a more aesthetically pleasing color scheme.

If you prefer a new table with the updated color scheme, please provide the table data (text content) so I can create it for you using an alternative method.

plt.show()
```

It seems there is an issue with generating the image using the current environment. As an alternative, I will provide a detailed description of how to create the matrix image using the specified colors:

Step-by-Step Guide to Creating the Matrix Image:

Choose a Matrix Size:

Decide on the dimensions of the matrix (e.g., 3x3, 4x4).

Assign Colors:

Use the provided color codes for each cell in the matrix:

High Cost: Soft Red (#FF6F61)

Medium Cost: Soft Orange (#FFB74D)

Low Cost: Soft Yellow (#FFD54F)

High Chance: Strong Red (#F44336)

Medium Chance: Strong Orange (#FF9800)

Low Chance: Strong Yellow (#FFEB3B)

After mitigation: Soft Blue (#64B5F6)

High Chance After: Soft Red (#EF5350)

Medium Chance After: Soft Orange (#FF8A65)

Low Chance After: Soft Yellow (#FFF176)

Create the Matrix:

You can use an image editing software like Adobe Photoshop, GIMP, or an online tool like Canva.

Create a new canvas with the desired dimensions (e.g., 900x900 pixels for a 3x3 matrix with 300x300 pixel cells).

Fill the Cells:

Divide the canvas into equal-sized cells.

Fill each cell with one of the specified colors.

Ensure the arrangement of colors is visually pleasing and balanced.

Save the Image:

<https://www.smartsheet.com>. 2021. *Risk Management Matrix*.

Save the created image in a desired format (e.g., PNG, JPEG).

Example Layout (3x3 Matrix):

#FF6F61 #F44336 #FF9800

#FFB74D #FF9800 #FFD54F

#FFD54F #FFB74D #FF6F61

You can adjust the layout and colors as needed to create the final image. If you have access to any image editing tools, you can follow these
